Installation Advisory IA E-04C.1

Model E-04C Remote installation E-04.10.1.14 cover

When installing the E-04.5.1 commercial remote if it is located in the vertical position where it can be subjected to spilled liquids, or in areas where crew, maintenance, or cleaning personal may inadvertently activate the ELT we recommend that our protective switch cover be installed.

To install simply place the cover over the remote face and press down until the cover is full seated on the face of the switch. To remove simply lift the tab on the cover.
