Service Bulletin SB E-04.1

To: ACK Technologies Inc. model E-04 121.5/406 MHz ELT distributors and installers

The model E-04 ELT is designed to be a direct replacement of the model E-01 ELT. The transmitter and battery of the E-04 weighs 1.6 Lbs. less than the model E-01 so the aircraft weight and balance should be updated. The E-04 and E-01 ELT have many parts that are interchangeable. This allows the retrofitting of older model E-01 equipped aircraft with the new model E-04 ELT utilizing many of the installed E-01 parts.

The following parts are interchangeable for use on either the model E-01 or E-04 ELT. All are certified under TSO C-91a and /or TSO C-126

Remote controls E0105 and E-04.5

Mounting trays E0104 and E-04.4

Front strap E0104A and E-04.4.1

Rear strap E0104B and E-04.4.2

Coax cables E0110C and E-04.10.4

Remote control cables E01108 and E-04.10.5

When ordering the model E-04 for retrofit of E-01 installations order our part number E-04R this part number contains only the parts required to for retrofit.

Note:

When using the E-01-05 remote with the model E-04 you must change the remote control placard as described in the installation manual.
